## NOTICE OF TENTATIVE APPROVAL - M/015/072

BEFORE THE DIVISION OF OIL, GAS AND MINING  
DEPARTMENT OF NATURAL RESOURCES  
STATE OF UTAH

IN THE MATTER OF TENTATIVE  
DECISION TO APPROVE A MINING AND  
RECLAMATION PLAN FOR G-P GYPSUM  
CORPORATION, HEBE GYPSUM MINE,  
EMERY COUNTY, UTAH

NOTICE OF TENTATIVE  
DECISION TO APPROVE  
NO M/015/072

THE STATE OF UTAH TO ALL OPERATORS, TAKERS OF PRODUCTION,  
MINERAL AND ROYALTY OWNERS, AND PARTICULARLY ALL PERSONS INTERESTED IN  
SECTIONS 13, 14, 15, 16, 23 AND 24, TOWNSHIP 24 SOUTH, RANGE 7 EAST, SLBM,  
EMERY COUNTY, UTAH.

Notice is hereby given by the Division of Oil, Gas and Mining of its tentative decision to approve G-P Gypsum Corporation's Mining and Reclamation Plan for the Hebe Gypsum Mine. Mining activities and access roads will effect the following area: SW1/4 of the SW1/4 of Section 13; SW1/4 of the SW1/4 of Section 14; S1/2 of the SE1/4, NW1/4 of the SE1/4; N1/2 of the SW1/4 of Section 15; NE1/4 of the SE1/4 Section 16; N1/2 of the NE1/4, SW1/4 of the NE1/4; N1/2 of the NW1/4 of Section 23; NW1/4 of the NW1/4 of Section 24; Township 24 South, Range 7 East SLBM., SLBM, Emery County, Utah

The operator will employ the following mining and reclamation techniques on approximately 32.9 acres of federal (BLM) land.

**During Operations:** Gypsum is exposed and visible on the proposed mine area. Overburden and topsoil (Cryptobiotic crust) will be removed with a dozer and excavator and stockpiled for use in reclamation. The gypsum will be fractured by drilling and blasting. A road reclaiming machine may also be used to mine the gypsum instead of drilling and blasting. Mined gypsum will be loaded into trucks using a front end loader. The gypsum will be trucked to G-P's plant in Sigurd for processing. Dust will be controlled at the mine site by water sprays on the road reclaiming machine or water truck. Dust from the haul road will be used by using mag chlorides and/or a water truck. Water for dust control will be obtained off site. The current access road from the county road will be widened and a turnaround is proposed to be constructed at each end. The main access road is included in the Right-of-Way agreements with the BLM and SITLA. Roads accessing the mine areas will include culverts or crossings as needed. Endangered cacti will be removed for storage and later transplanting as mining advances according to U.S. Fish and Wildlife mitigation plan. Cacti will be transplanted directly when these areas are being concurrently reclaimed. Seed from cacti will be collected annually in advance of mining activities within that area.

**Following Operations:** All equipment and debris from operations will be removed from the site. Hard surfaces such as roads or staging areas will be ripped to a minimum depth of twelve inches with a dozer. Soils salvaged along the main access road will be spread or regraded onto the ripped areas. A loader will be used to transfer the stockpiled overburden and sub-grade gypsum onto the mine area to be reclaimed, or this material will be loaded into a truck or placement on the area to be reclaimed. A dozer and road grader will be used to spread this material and grade the area to blend with the natural contours. The surface of this area will be left in a roughened condition to enhance soil and water retention. The Cryptobiotic soils will be spread over this area using a mechanical spreader. This area will be seeded with the BLM seedmix using a drill seeder or broadcast seeder as access allows. All culverts and drainage diversions will be removed and the natural drainages restored to their approximate original condition.

The person representing the company in Mr. Russ Harms Phone (702) 643-8100. G-P Gypsum Corporation is fulfilling obligations under the Utah Mined Land Reclamation Act of 1975, Utah Code Ann. §40-8-18.

Any person or agency aggrieved by this tentative decision to issue approval is hereby requested to submit written protest within thirty (30) days of the date of publication to Mary Ann Wright, Associate Director of Mining, Division of Oil, Gas and Mining, 1594 West North Temple, Suite 1210, Box 145801, Salt Lake City, Utah 84114-5801, setting forth factual reasons for the complaint. If no responsive written protests are received by the Division within 30 days after the last date of publication, the tentative decision of the Division will be final.
